

STUDYMATE

An AI Powered PDF-based Q&A System for
students

<http://172.17.6.227:8501>

ABOUT

StudyMate is an AI application used to help students, teachers and intellectual explorers to learn new concepts in a better and efficient way.

OUR VISION

Our vision is to encourage learning in an exciting manner with the use of flashcards and quizzes with daily tracking of the concepts and encouraging the user to learn more, the application takes lesser time to analyze information and responds accurately.

OUR MISSION

- Every user must cultivate a habit of learning of new things using this application.
- The user should think of the application like a companion trying to help them.

PROCESS

We started with the frontend using Streamlit, CSS, HTML with an ocean blue color palette and later continued to the backend using python programming language as a base. Gemini API along with IBM watsonx and FAISS is used.

GOALS

- Organize Study Routines
- Helps users structure their study sessions with task lists, schedules, and reminders.
- Set and Track Study Goals
- Allows students to define academic targets and monitor progress over time.
- Enhance Learning Efficiency
- Offers AI-powered tools like flashcards, summaries, and interactive quizzes to boost retention.
- Personalized Learning Plans
- Adapts to individual learning styles and pace, making study sessions more effective.
- Progress Analytics
- Provides visual insights into completed tasks, time spent, and overall performance.
